1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-14,46, drawn to a test circuit with a primary winding wherein the current in coils being switched, classified in class 324, subclass 235.
- II. Claims 15-18, drawn to a test circuit with a primary winding having a minimum net dipole moment, classified in class 324, subclass 228.
- III. Claims 19-23, drawn to a test circuit with a GMR encircled by a feedback coil, classified in class 325, subclass 225.
- IV. Claims 24-38, drawn to an apparatus for measuring volumetric properties with an array of sensing elements, classified in class 324, subclass 243.
- V. Claims 39-42, drawn to a method for determining properties using a model and a table look-up operation, classified in class 324, subclass 234.
- VI. Claims 43, drawn to a method for improving sensitivity of a sensor by altering the velocity, classified in class 324, subclass 260.
- VII. Claims 44, drawn to a method for performing inverse interpolation, classified in class 702, subclass 127.

VIII. Claim 45, drawn to a method for performing inverse interpolation using a linear interpolation to determine the final interpolated parameter values, classified in class 702, subclass 179.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-VII are distinct. Inventions are distinct if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions; modes of operation and different effects.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to John Card on April 24, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
